## Professional Summary

Accomplished Solution Architect with over 18 years of extensive experience in enterprise strategy, enterprise data architecture, and solution design. Demonstrated expertise in designing and delivering cost-effective, high-performance IT infrastructures and applications to address complex business challenges. Proven track record in managing large global teams and holding P&L responsibilities. Certified AWS Solution Architect, Google Cloud Certified Architect, Google Cloud Professional Data Engineer, PMP®, PRINCE2® Foundation, ITIL® 2011 Foundation, SCJP1.4®, SCWCD 5®. Experienced in Investment Banking, Telecom, Manufacturing, Logistics, and Retail domains.

## Core Competencies

- Enterprise Architecture Design: Expertise in defining scalable and resilient enterprise architectures, focusing on cloud modernization, microservices, and Kubernetes.
- Data Architecture & Management: Architecting and implementing data lakes, ETL processes, and data integration frameworks (Snowflake, MongoDB, Debezium).
- Cloud Platforms & Technologies: In-depth experience with AWS, Google Cloud Platform (GCP), GKE, Kubernetes, and cloud-native tools.
- API & Microservices Architecture: Expertise in API management, microservices design using Spring Boot, and Kubernetes deployments.
- Data Integration & Transformation: Leading initiatives in ETL, CDC solutions, and workflow engines like Camunda and Apache Camel.
- Vendor & Tool Selection: Evaluating and selecting tools for data transformation, integration, and cloud infrastructure.
- Team Leadership & Collaboration: Managing global teams, mentoring engineers, and collaborating with stakeholders across business and technical teams.
- Business Development & Client Engagement: Driving sales, client relationships, and project delivery for global enterprise clients.
- Finance Management & P&L: Budgeting, financial planning, and optimizing profitability across technology projects.
- Stakeholder Management: Engaging with business leaders, project sponsors, and technical teams to define project goals and expectations.

## Professional Experience

### HSBC – Solution Architect

Sep 2018 – Present | Full-time

- Led architecture for multiple large-scale transformation projects, including migrating legacy systems to cloud-based solutions with a focus on Kubernetes and MongoDB.
- Designed and implemented MongoDB-based CQRS patterns for high-availability, low-latency systems.
- Evaluated and selected tools for ETL workflows, CDC solutions (Debezium), and workflow orchestration tools like Camunda to streamline enterprise integration.
- Provided leadership in defining cloud strategy and roadmaps, ensuring scalability, resilience, and security across platforms like GKE and AWS.
- Mentored cross-functional teams, including cloud architects, developers, and data engineers, ensuring best practices in cloud architecture and data management.

### Cognizant Technology Solutions – Technical Architect

Jan 2016 – Sep 2018 | Full-time

- Designed and implemented microservices-based solutions using Spring Boot, Apache Camel, and Kubernetes, improving operational efficiency and scalability.
- Led the architecture of cloud-native data solutions and APIs, focusing on scalability and high performance.
- Collaborated with client teams to assess requirements and translate them into robust, flexible technical solutions.
- Supported business development initiatives by engaging with clients and contributing to RFPs and project proposals.

### Capgemini – Senior Consultant

Sep 2014 – Jan 2016 | Full-time

- Provided technical leadership and architectural design for enterprise applications and data solutions.
- Led the migration of legacy systems to cloud platforms, ensuring improved performance, cost-efficiency, and security.
- Worked with stakeholders to deliver end-to-end enterprise integration solutions, including cloud-based data pipelines and real-time data processing systems.

## Education

B.Tech/B.E. in Computers – Pune University | Graduated: 2006

## Certifications

- Google Cloud Certified Professional Architect
- Google Cloud Professional Data Engineer
- AWS Certified Solutions Architect
- PMP® (Project Management Professional)
- PRINCE2® Foundation
- ITIL® 2011 Foundation
- SCJP1.4® (Sun Certified Java Programmer)
- SCWCD 5® (Sun Certified Web Component Developer)

## Technical Skills

- Cloud Platforms: AWS, Google Cloud Platform (GCP), GKE, Kubernetes, Cloud Foundry (PCF)
- Big Data & Data Tools: Snowflake, MongoDB, BigQuery, Dataflow, Apache Camel, Debezium, Camunda
- Programming Languages: Java 8, SQL, PL-SQL, HTML
- Other Tools: Terraform, Docker, Jenkins, Kubernetes
- Methodologies: Agile, ITIL, DevOps, TOGAF

## Professional Affiliations

- Member, Project Management Institute (PMI)
- Member, The Open Group Architecture Framework (TOGAF)
- Member, Cloud Native Computing Foundation (CNCf)
